Tenney T10C Cascade Environmental Temperature Test Chamber Synergy NANO Control Package

Synergy NANO Controller to be Installed

[click to enlarge](#)

Tenney T10C Environmental Temperature Test Chamber Specification:

- Temperature Range:
 - -73C to +200C
- Interior Dimensions:
 - 24"W x 28"H x 27"D
- Electrical:
 - Voltage: 208
 - Phase: 1
 - Amps: 40
- Control Package:
 - Synergy NANO Controller Package to be Installed
- Watlow Temperature Protection Control package
- Cooling Boost System
 - Ln²
- Air Cooled Refrigeration System no need for facility water

The Synergy Nano combines the functions of a test chamber controller and a data logger. It moreover allows users to program up to six custom outputs for special applications and optional features. Process inputs include RTD, Thermocouple, voltage and current. Boasting the Microsoft Windows™ CE.NET operating system, this feature-rich system's sophisticated communications capabilities also include built-in remote control/monitoring.
